

► **A2024-RAM2[™]**
(High Strength and Ductile Aluminum)

Product Information

Elementum 3D's 2024 Aluminum Metal-Matrix Composite (MMC) with two percent ceramic provides excellent strength, good ductility along with the wear resistance of ceramic reinforcing phases. A2024-RAM2 is suitable for many applications and is an outstanding additive material solution for structural components. It is heat treatable like wrought 2024 aluminum.

Piston head - as printed.

Timing wheel - glass bead blasted.
