

▶ IN625-RAM2™

(High temperature strength and corrosion resistant)

Product

Elementum 3D's IN625-RAM2 nickel superalloy offers excellent mechanical strength and creep resistance at high temperatures, good surface stability, and corrosion and oxidation resistance, while maintaining high strength, hardness, and wear. IN625-RAM2 is targeted towards aerospace and power industry applications such as turbine blades and jet/rocket engines, industrial gas turbines, heat exchangers and nuclear components. Elementum 3D can offer the IN625-RAM2 in 40µm, 60µm and 80µm layer printing parameters.
